#### Notes:

1. The figures supplied are for 'visits' rather than 'visitors'.
2. A visit is defined as a "measurement unit involving a person going onto lands and waters of a park or protected area for the purposes mandated for the area".
3. A visit has no duration data associated with it i.e. if a person leaves the park and re-enters later a second visit is recorded.
4. Trail counter data refer to counter passes, not total visits or total visitors. Figures do not represent total use.
5. Figures in *italics* are estimates - estimates may have been used where data is missing due to hardware fault etc.
6. Figures in **blue** are incomplete i.e. access closures due to wet conditions to prevent spread of Dieback.
7. Figures in **orange** are incomplete i.e. access closures due to fire.
8. The data provided is the best available at time of reporting. Data has been checked for consistency and errors, but some may still exist.
9. The data provided is the property of the Department of Biodiversity, Conservation and Attractions and this must be acknowledged explicitly in any publication using the data.
10. March 2020 data onwards cannot be reliably compared to pre-COVID figures due to changes in international, interstate and intrastate visitation travel due to border restrictions and other COVID-related impacts.
11. Western Australia borders reopened to interstate and international visitors on 3 March 2022.
