I believe our pristine natural environment can coexist with the industries which breathe life into our towns like agriculture, tourism, and mining.

It is time for younger voices to be heard at the local level. Decisions we make today will echo down the years, impacting us as well as our children. I don't have all the solutions to the complex challenges that we face, but my aim is to hear from every age group and demographic in Ravensthorpe.

We chose this Shire to raise a child in because of the wonderful community we found here, but stable and affordable housing is hard to find. This propels me to find practical solutions with fellow councillors.

I've been part of groups such as St John Ambulance, RAIN and the Sporting Shooters Association, and these engagements have provided me with a wide-angle view of the community's needs. My commitment is to serve with dedication, striving to find that balance between tradition and innovation, and between immediate needs and long-term sustainability.
