---

**Summary:**

An application has been received from Jullieanne Laurie requesting permission to keep three dogs at her property at Unit 2/51 Dunn Street, Ravensthorpe. She currently owns two small breed dogs, a fox terrier aged nine and a west highland terrier aged twelve, which are micro-chipped and registered. The third dog which she owns is a Border collie x, five years old which is also registered, and in the process of being microchipped.

**Background:**

It is a requirement of the Ravensthorpe Shire Council's Dogs Local Law (2011) that the maximum number of dogs that can be kept on a premise within a town site is two unless an exemption is granted by Council under the provisions of section 26(3) of the Dog Act 1976 (as Amended).

**Comment:**

It is recommended that Council agree to the granting of an exemption for the keeping of three dogs at Unit 2/51 Dunn Street, Ravensthorpe subject to the following conditions:

- That the exemption be reviewed in twelve months to ensure that no adverse problems have been experienced as a result of the exemption, and
- That Council reserve the right to withdraw the exemption at any time if any major or substantial problems are experienced prior to the review period.
- That the exemption applies only to the dogs nominated by the applicant.
- Each dog on the property must be registered with the Shire of Ravensthorpe.
- Upon the death or permanent removal of any of the nominated dogs a maximum of two dogs only will be permitted to be kept on this property.

**Site Inspection Undertaken:**

Yes

**Site Inspection:** The Shire Ranger inspected the property and has advised that there are no reasons to withhold the granting of an exemption to keep three dogs at the property. The property is adequately fenced to contain the dogs.

**Consultation:**

A Neighbour Submission form was provided to Unit 3/51 Dunn Street, Ravensthorpe and 49 Dunn Street Ravensthorpe. The adjoining neighbours were given 14 days to respond. The Shire Ranger has liaised with one adjoining neighbour, Terry Yorkshire and feedback returned stated that he has no obligations to Jullianne Laurie keeping three dogs. Attempts were made to speak with the occupier of 49 Dunn Street, Ravensthorpe, the occupier of the premises was not present at the time of visit, and therefore a neighbour submission form was left on the door. There was no feedback submitted from 49 Dunn Street, Ravensthorpe in the time frame provided. The Shire Ranger has considered that there are no valid reasons for withholding such approval.

**Summary:**

The purpose of this item is to present to Council a proposed Asset Management Policy for consideration and adoption.

**Background:**

Staff have been working with members of the Goldfields Voluntary Regional Organisation of Councils (GVROC) and a consultant to develop asset management plans based on a common platform. As a part of this process the need for an asset management policy has been identified.

The NAMS platform was selected as it provides a good style of asset management plan that can be developed in-house by staff with minimal external assistance. This framework has been developed by the Institute of Public Engineers, is particularly suited to smaller local governments including Ravensthorpe, and is supported by a range of technical expertise.

The draft Asset Management Plan (AMP) is presented as a separate item to Council at this meeting for their consideration. To support the AMP an asset management policy has also been developed – using a model policy from the NAMS platform.

The draft policy as presented will help ensure processes and procedures are in place to help maintain our assets with a replacement cost of over \$178 million including budgeting for repairs, upgrades and/or replacement. The third step in the process will be the development of an asset management strategy aimed at assisting Council in improving the way it delivers services with the infrastructure assets it owns, both now and into the future.

These documents will help inform the development of a new Long Term Financial Plan and Corporate Business Plan. All these documents form part of the integrated planning framework or local governments to work within.

**Summary:**

The purpose of this item is to present to Council a proposed Asset Management Plan (AMP) for consideration and adoption.

**Background:**

Staff have been working with members of the Goldfields Voluntary Regional Organisation of Councils (GVROC) and a consultant to develop asset management plans based on a common platform. The current AMP was prepared by an external consultant as a part of the initial integrated planning framework and has not been updated since adopted by Council. The supporting documentation used in developing the plan was never given to Council which is disappointing.

**Comment:**

As reported under the Asset Management Policy item GVROC was successful in obtaining a grant to assist members develop asset management plans and train staff in the use of the platform chosen. The NAMS platform was selected as it provides a good style of asset management plan that can be developed in-house by staff with minimal external assistance. This framework has been developed by the Institute of Public Engineers, is particularly suited to smaller local governments including Ravensthorpe, and is supported by a range of technical expertise.

The draft Asset Management Plan (AMP) presented to has been prepared using the NAMS platform by staff and an external consultant. The size of our asset base has allowed one overall plan to be developed rather than a plan for each class of asset thus giving a more integrated planning approach.

The plan is based on current asset values and can be readily updated as improvements are made to our asset register. This will include adjustments following the completion of repairs to the road network post the February 2017 floods and as staff work to improve depreciation and valuation schedules over time.

Improvements in financial budgeting and reporting to better reflect maintenance, improvements/upgrades and replacement will also help better inform the data that is used to develop and update the AMP. There will be reviews of useful life of assets and importantly levels of service which all impact the required management of our assets. With a declining population it is important to regularly review our levels of service to ensure whilst the community is well catered for there is not excess expenditure on a service provided just simply because that is what has happened in the past. With available funding reducing and

community expectations growing this will help ensure value for money is obtained wherever possible. Any change in service provision, especially a reduction, may meet with community dissatisfaction but Council's role is ensure the long term provision and financial viability of any service for the benefit of the wider community.

The advantage of using the NAMS platform is the majority of the updates can be completed in-house adding to the staff "ownership" of the AMP and reducing cost of using external consultants.

The AMP will help inform the development of a new Long Term Financial Plan and Corporate Business Plan which in turn assist Council and staff in framing the annual budget. There will be regular reviews of the AMP, not necessarily restricted to the legislated 4 year review requirement.
